Official bulleting board

The official bulletin board is located at <http://www.erally.is/notice-board>. Copies of all official communications are also posted there in chronological order with the latest being posted at the top.

Early arrival into time controls

Competitors are allowed to arrive early without penalties into the time controls at the end of all legs.

Units of Measure

The decimal separator used in this roadbook in distances is a **decimal comma**.

Throughout this roadbook the units of measure for distance and speed are km and km/h respectively. This especially applies to the distance columns **TOTAL**, **PARTIAL** and **TO GO** which are all in km.

The average speed is indicated in the **DIRECTION** column by a figure in a circle, as the example to the right shows.

The average speed applies until the next such sign in the **DIRECTION** column or the end of the regularity.

| 2 | 1,417 | 1,42 | | | | | 9,35 |
| | | |  | Sign: Vatnsleyubær | | | |

The units of measure for GPS coordinates in the roadbook are degrees with minutes in decimal notation. The longitude and latitude designation of N and W are after each figure.

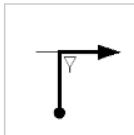

Example:

64° 16,514'N
19° 40,395'W

Road book measurements

Measurements for the roadbook were done to three decimal places. The roadbook shows these rounded to two decimal places. Thus you may get calculations in the **PARTIAL** column which seem 0.01 out.

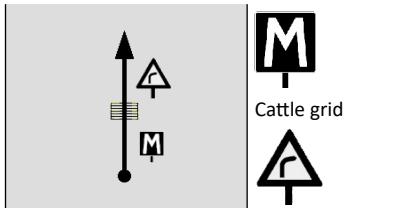

The below example uses the figures 9.535 and 10.202 to show this:

| # | TOTAL | PARTIAL | DIRECTION | INFORMATION | TO GO |
|---|-------|---------|---|--------------------|-------|
| 1 | 9.54 | 0.00 |  | Merge with traffic | 12.83 |
| 2 | 10.20 | 0.67 |  | Give | 12.16 |

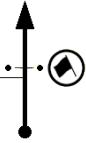

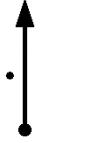

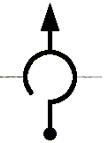

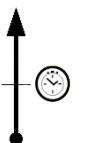

Multiple signs / action in one tulip

On numerous occasions there will be more than one sign displayed in a single tulip. In the below example the tulip shows from bottom to top the signs / actions in the direction of travel. The **INFORMATION** column reflects this in text – in other words you first come to the M sign, then to the cattle grid and finally to the warning of sharp right bend.

This may seem strange, but they both show / say the same.

Notations - examples

| | | | |
|---|--|---|---|
|  | Start of Regularity |  | Cattle grid |
|  | Regularity start sign |  | Junction with traffic lights and indication of which route to take |
|  | Something noteworthy on left hand side |  | Route to be taken |
|  | Route to be taken at a roundabout |  | The average speed to use from this tulip until the next average speed tulip or to the End of Regularity |
|  | TC-XX Time Control – number is shown in the description |  | Back of sign |
|  | Merge with road |  | Indicates a sign by side of road |

When a distance between two lines or tulips in the roadbook is less than 200m no line will be printed in the **DIRECTION** and **INFORMATION** columns. This is to draw the attention to how close they are.

In the below example the **orange** color shows where there is no line, and the green color the normal printed line.
